

Musson Brothers will be back in Roxbury on June 1st to start installing the lateral liners. They will leave a door hanger on your front door the day before they work on your lateral, so keep an eye out on your front door. Musson will be asking that you not use water for about 1-2 hours while they are installing the liner on your lateral.

It should take Musson approximately 3-4 weeks to complete all the laterals in town. They will also cut the cleanout down so its buried about 12 inches below ground and finish with topsoil and seed.
